ICRA 2013

The 2013 IEEE International Conference on Robotics and Automation (ICRA 2013) will be held in Karlsruhe, Germany on May 6-10, 2013. The conference theme is "**Anthropomatics - Technologies for Humans**" highlighting the paramount role of Robotics and Automation in improving human quality of life.

Contributed Papers
Prospective authors should submit PDF versions of their paper. Six pages in standard ICRA format are allowed for each paper, including figures. A maximum of two additional pages is permitted. We also invited authors to submit a video clip to complement the submission. Detailed instructions for submission are available on the conference website.

Paper Presentation
Papers will be presented in two modes at either interactive sessions or oral sessions. The majority of papers at ICRA 2013 will be presented in interactive sessions. At paper submission, authors will be asked to select one of these two presentations modes. Oral sessions will contain 15 minutes of presentation in parallel sessions. Interactive sessions will present work similar to poster sessions but on a large screen for the full durations of one sessions. A table will be provided for the computer and small demonstrations. Details are available on the conference website.

Tutorials and Workshops
Proposals for half- or full-day tutorials and workshops will be reviewed according to instructions on the conference website. Prospective organizers should emphasize novelty of topics and relation to ICRA.

Exhibits
An exhibition site will be featured at the venue. Information for prospective exhibitors will be available on the web site.

Important Dates
September 17, 2012: Submission deadline
January 7, 2013: Acceptance notification
February 11, 2013: Final contribution deadline
